

## Roller Blinds

Rollers are different to the Holland's most Aussies grew up with in the 70s-80s. Rather than being controlled by springs, they are either chain controlled or motorized. The chains are made of stainless steel or they can be black or white plastic if you choose. We have a huge range of fabrics and there is three types of fabric Block out to stop the light, Translucent to let the light in but stop glare, heat, UV and give you privacy day and night. Then there is Sheer which will stop some heat, UV, Glare and people cant see in from outside during daytime, but at night it works in reverse.

With a choice of 8 base rails and four different style base rails Inc. flat, designer, round and most popular oval you have plenty of choice. Bracket colors come in a choice of three colors, black, white and grey. Rollers can be reverse rolled or standard rolled.

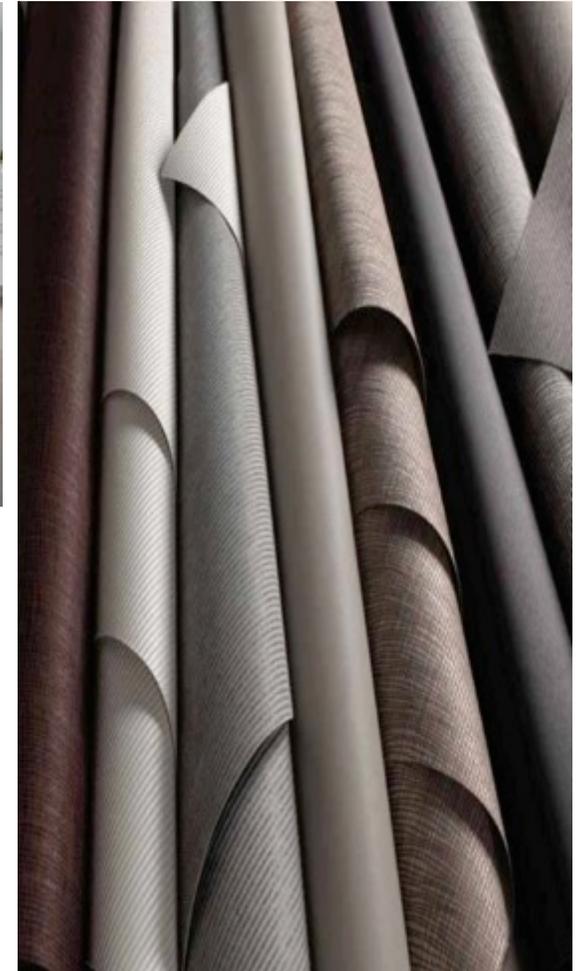

We give you booster springs if your blinds are oversize to reduce the weight of the blind when pulling it up.

Most fabrics are stain & mold resistant and all fabrics are ultrasonically cut to prevent fraying.

# Rollers

Top quality Australian made roller blinds are the ultimate solution against the elements for any window

# Quality is Guaranteed

We guarantee you will be so impressed by the quality of our Roller Blinds, as we only use Australian mechanisms, brackets, roller tubes and Australian made fabrics.

Plus we have the largest fabric range in Perth including every Designer brand to choose from. Our fitters are the best in the business and our team knows their stuff.

Perth Eagle Blinds has 30 years of experience providing only the best premium products & we always ensure you will receive the best quality available.

## Motorize your blinds

Motorized blinds come in several options. Remote controlled hard-wired being the most common. Using a 240v power supply, it's pretty easy for an electrician to fit in most homes and comes with a 5-year warranty. We only use Australian made motors so we can guarantee quality.

Switch controlled is also a common option and can be linked up to home automation systems too. Also running on 240v and 5 year warranty. We supply you the molex cable for both switch and remote control blinds prior to the blinds install date.

Battery operated motors are now also common and will last up to 5 years once set up. 5 Year warranty too.

*“Remote controlled Roller Blinds will be in most homes in Perth by 2025, so don't get left behind”*

Quoted by Paul Assinder- Sales Director/Designer

## Dual Rollers

Dual Rollers are made up of sheer & block out fabrics on two separate roller tubes on the same dual bracket. Sheer giving you daytime privacy and block out to darken the room and give you 100% privacy. There are two bracket options, standard 125mm bracket and Peanut bracket

Being 100mm. Bracket colors are white, black or grey and made by Accede. All Fabrics are Australian made and there is huge range to choose from. There is 8 base rail colors to select from and the chain controls are made of stainless steel. Unless you have chosen motorized blinds, then see above for Motorized blind info. Dual blinds are the perfect option for street facing rooms or Bedrooms. Dual blinds will keep your home cool in summer and keep the heat in during the cooler winter months.
